

Ricoh

**Outstanding Achievement in Innovation
for Ricoh Intelligent Scanning**

RICOH

Ricoh Intelligent Scanning, chosen by Buyers Lab analysts as a winner of a Winter 2019 Outstanding Achievement in Innovation award, offers...

- Fast scan speeds and small compressed color file sizes
- Double-feed detection to reduce the risk of missed pages
- Auto-file split capability to scan and email files in manageable sizes
- Scan support for smaller-size items

“Scanning is becoming more and more prevalent in everyday workflows, and the features and innovations with Ricoh’s new line of colour copiers help make for a simple, fast, and accurate scanning experience,” said George Mikolay, Keypoint Intelligence’s Associate Director of Copiers/Production. “In addition to fast scan speeds, small compressed colour file sizes, and a scan preview, standard colour dropout capability allows users to remove background colour elements from forms or other documents, which can be a great aid to automatic document processing such as Optical Character Recognition. Moreover, the single pass document feeder supports a double-feed detection unit that allows for fast, accurate scanning and reduces the risk of missed pages and the need to repeat tasks, a critical concern in environments such as law firms.”

“Scan file management is further boosted by the unit’s auto-file split capability, which enables multiple-page documents to be automatically scanned and emailed in manageable sizes in conjunction with a company’s email file size policy limits,” said Keypoint Intelligence’s Priya Gohil, Senior Editor. “And scan support for smaller-size items such as bank cheques, receipts, and ID cards is very useful for those working in the finance or hospitality sectors. Thanks to the Office 365 package via Ricoh Smart

Integration, users can scan to Microsoft Word and Excel to create fully editable Excel spreadsheets and Word documents. This eliminates the need to reproduce or search for the original electronic document to reuse and also allows users to edit and add information to a digital version of a hard copy document.”

About Keypoint Intelligence - Buyers Lab

Keypoint Intelligence is a one-stop shop for the digital imaging industry. With our unparalleled tools and unmatched depth of knowledge, we cut through the noise of data to offer clients the unbiased insights and responsive tools they need in those mission-critical moments that define their products and empower their sales.

For over 50 years, Buyers Lab has been the global document imaging industry’s resource for unbiased and reliable information, test data, and competitive selling tools. What started out as a consumer-based publication about office equipment has become an all-encompassing industry resource. In a landscape that’s ever evolving, we change with it.

About Buyers Lab Outstanding Achievement Awards

Buyers Lab Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, or value.
