

SMART DIGITAL SIGNAGE SOLUTIONS

Empower your Business

Digital signage enables you to be where people are and to communicate what is relevant and interesting at that particular time and place. Your screens can be located anywhere in the world and you can convey messages on the screens you choose with a few simple clicks.

- High-brightness and anti-glare options available
- Ideal for use in shopping centres and retail POS
- Control dynamic content remotely across multiple displays using a web-based interface
- Calendar-based scheduling
- Professionally designed templates available

B2B Technologies has a wide range of screens to suit any requirement. We offer full delivery supply installation, support, and professional user training to facilitate the complete integration of the digital signage solution into your environment.

Available on flexible rental packages. No capital outlay needed.
